

Ostocko
(<https://pharma.xuppyter.in>)

Date: September 9, 2026 – September 14, 2026

Tested by: faizan_shamsi01 (from Fiverr)

Platform: Android 15 (Mobile) + Windows 10 (Desktop) + iOS 18 (Mobile)

Browsers Tested: Chrome, Firefox, Edge, Opera, Brave & Safari

Testing environment: Live testing

Summary: Key problem areas include AI comparison logic giving wrong recommendations, quotation data not syncing between supplier and pharmacist, request statuses not updating, silent failures where buttons do nothing without any error, and mobile layout issues.

Total bugs: 53

High: 23

Medium: 22

Low: 7

Suggestions: 2

Overall status: Not ready for production. Multiple high severity bugs affect core workflows including AI comparison, quotation handling, and request status updates. Silent failures and mobile issues further impact usability. Recommend fixing all High severity bugs before release.

BUG-001

Title: Main logo invisible in light mode

Status: Not a Bug / Pending Client Asset

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Header / Global (appears on all pages)

Steps to Reproduce:

1. Open <https://pharma.xupyer.in/en>
2. Ensure site is in light mode
3. Observe the header/logo area
4. Switch to dark mode and compare

Severity: Medium

Priority: Medium

Actual Result: Logo is not visible or blends into the background in light mode. Only visible in dark mode.

Expected Result: Logo should be clearly visible with proper contrast in both light and dark modes.

Photo Attachments:

BUG-002

Title: "Contact Sales" button leads to 404 error page

Status: Not a Bug / Out of Scope

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Bottom CTA section — "Ready to get started?" / "Join Thousands of Pharma Businesses Worldwide"

Steps to Reproduce:

1. Open <https://pharma.xuppyter.in/en>
2. Scroll to the bottom CTA section ("Ready to get started?")
3. Click the "Contact Sales" button
4. Observe the result

Severity: High

Priority: High

Actual Result: Clicking "Contact Sales" redirects to a 404 "Page Not Found" error.

Expected Result: Clicking "Contact Sales" should open a contact form, mail client, chat, or navigate to a working contact page.

Photo Attachments:

BUG-003

Title: Footer "Marketplace" link under Platform just reloads the page instead of navigating

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Footer → Platform section → Marketplace link

Steps to Reproduce:

1. Open <https://pharma.xuppyter.in/en>
2. Scroll to the footer
3. Under "Platform" section, click "Marketplace"
4. Observe the result

Severity: Medium

Priority: Medium

Actual Result: Clicking "Marketplace" reloads the current page and stays in the same position. It does not navigate anywhere.

Expected Result: Clicking "Marketplace" should navigate to the marketplace page or scroll to the relevant section.

Photo Attachments:

BUG-004

Title: Brand name inconsistency — Terms of Service uses "PharmaProc" instead of "Ostocko"

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Terms of Service page (<https://pharma.xuphyter.in/en/legal/terms>)

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Terms of Service" under Legal section
4. Read the page content
5. Compare brand name with header/logo/footer

Severity: High

Priority: High

Actual Result: Entire Terms of Service page refers to the platform as "PharmaProc" instead of "Ostocko". Contact email shows support@pharmaproc.com and app URL shows <https://app.pharmaproc.com>.

Expected Result: Terms of Service should consistently use the correct product name "Ostocko" with matching contact email and app URL.

Photo Attachments:

BUG-005

Title: Conflicting and duplicated dates at top of Terms of Service page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Terms of Service page (<https://pharma.xuphyter.in/en/legal/terms>)

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Terms of Service" under Legal section
4. Observe the dates at the top of the page

Severity: Low

Priority: Low

Actual Result: Page shows:

"Last updated: September 7, 2026" & "Effective date: 5 September 2026 Last updated: 5 September 2026"

Dates are duplicated, conflicting, and use inconsistent formatting.

Expected Result: Should show one clear "Last updated" date and one "Effective date" in consistent format.

Photo Attachments:

BUG-006

Title: Template disclaimer text visible to end users on Terms of Service page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Terms of Service page (<https://pharma.xuphyter.in/en/legal/terms>) — bottom of page

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Terms of Service" under Legal section
4. Scroll to the bottom of the page
5. Read the last line

Severity: Medium

Priority: Medium

Actual Result: The last line states: "Template for product use — not legal advice. Have counsel review your jurisdiction, regulatory regime, and billing setup before production."

Expected Result: This internal template note should be removed before production. End users should never see developer/template instructions.

Photo Attachments:

BUG-007

Title: Operator name mismatch on Terms of Service page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Terms of Service page (<https://pharma.xuphyter.in/en/legal/terms>) — top section

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Terms of Service" under Legal section
4. Observe the Operator information at the top

Severity: Medium

Priority: Medium

Actual Result: Operator is listed as "PharmaProc (Xuphyter Solutions)" with email support@pharmaproc.com — but the product is branded as "Ostocko" throughout the site.

Expected Result: Operator name should match the product branding (Ostocko) with correct support email.

Photo Attachments:

BUG-008

Title: Link next to support email on Terms of Service page leads to unreachable site

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Terms of Service page — top section, under "Last updated" / next to support email

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Terms of Service" under Legal section
4. Locate the support email at the top of the page
5. Click the link next to the email
6. Observe the result

Severity: Medium

Priority: Medium

Actual Result: Link is clickable but redirects to a page showing "Site can't be reached" error.

Expected Result: The link should open a working destination (likely <https://app.pharmaproc.com> or a valid app URL).

Photo Attachments:

BUG-009

Title: Brand name inconsistency — Privacy Policy uses "PharmaProc" instead of "Ostocko"

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Privacy Policy page (<https://pharma.xuphyter.in/en/legal/privacy>)

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Privacy Policy" under Legal section
4. Read the page content
5. Compare brand name with header/logo/footer

Severity: High

Priority: High

Actual Result: Entire Privacy Policy page refers to the platform as "PharmaProc" instead of "Ostocko". Contact email shows support@pharmaproc.com. Platform URLs reference app.pharmaproc.com and api.pharmaproc.com.

Expected Result: Privacy Policy should consistently use the correct product name "Ostocko" with matching contact email and platform URLs.

Photo Attachments:

BUG-010

Title: Conflicting and duplicated dates at top of Privacy Policy page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Privacy Policy page (<https://pharma.xuphyter.in/en/legal/privacy>)

Steps to Reproduce:

1. Open <https://pharma.xuphyter.in/en>
2. Scroll to footer
3. Click "Privacy Policy" under Legal section
4. Observe the dates at the top of the page

Severity: Low

Priority: Low

Actual Result: Page shows:

"Last updated: September 7, 2026" & "Effective date: 5 September 2026 Last updated: 5 September 2026"

Dates are duplicated, conflicting, and use inconsistent formatting.

Expected Result: Should show one clear "Last updated" date and one "Effective date" in consistent format.

Photo Attachments:

BUG-011

Title: Template disclaimer text visible to end users on Privacy Policy page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Privacy Policy page (<https://pharma.xuppyter.in/en/legal/privacy>) — bottom of page

Steps to Reproduce:

1. Open <https://pharma.xuppyter.in/en>
2. Scroll to footer
3. Click "Privacy Policy" under Legal section
4. Scroll to the bottom of the page
5. Read the last line

Severity: Medium

Priority: Medium

Actual Result: The last line states: "This template is provided for transparency and does not constitute legal advice. Have counsel review before production use."

Expected Result: This internal template note should be removed before production. End users should never see developer/template instructions.

Photo Attachments:

BUG-012

Title: Controller name mismatch on Privacy Policy page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Privacy Policy page (<https://pharma.xupxyter.in/en/legal/privacy>) — top section

Steps to Reproduce:

1. Open <https://pharma.xupxyter.in/en>
2. Scroll to footer
3. Click "Privacy Policy" under Legal section
4. Observe the Controller information at the top

Severity: Medium

Priority: Medium

Actual Result: Controller is listed as "PharmaProc (operated by Xupxyter Solutions)" with email support@pharmaproc.com — but the product is branded as "Ostocko" throughout the site.

Expected Result: Controller name should match the product branding (Ostocko) with correct support email.

Photo Attachments:

BUG-013

Title: OCR service error when uploading catalog — "temporarily unavailable"

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier catalog upload / OCR processing

Steps to Reproduce:

1. Login as supplier
2. Navigate to catalog upload
3. Upload a PDF catalog file
4. Wait for processing
5. Observe the error message

Severity: High

Priority: High

Actual Result: Error message displayed: "We could not process your file right now. The OCR service is temporarily unavailable. Please try again."

Expected Result: File should upload and OCR should process the catalog successfully without errors.

Photo Attachments:

BUG-015

Title: Catalog upload stuck on loading spinner — OCR processing never completes

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Catalog Upload / OCR Processing

Steps to Reproduce:

1. Log in as supplier
2. Navigate to Catalog Upload section
3. Upload a PDF catalog file
4. Wait for processing to complete
5. Observe the loading spinner

Severity: High

Priority: High

Actual Result: After uploading the PDF, the page shows a loading spinner indefinitely. Processing never completes. No timeout triggered even after developer deployed a fix. Waited 30+ minutes after fix — still stuck with no error or retry hint.

Expected Result: OCR processing should complete within a reasonable time. After fix, should either complete successfully or timeout gracefully with a clear retry option.

Photo Attachments:

BUG-016

Title: Retry button on failed catalog import says "No source text available" even though file is present

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Catalog Import → Failed import retry

Steps to Reproduce:

1. Log in as supplier
2. Upload a PDF catalog
3. Wait for import to fail
4. Click the retry button
5. Observe the error message

Severity: Medium

Priority: Medium

Actual Result: Clicking retry shows error: "No source text available for retry. Please re-upload the file.", even though the PDF file is visible right below.

Expected Result: Retry button should reprocess the existing uploaded file without requiring a full reupload.

Photo Attachments:

BUG-017

Title: Catalog import fails with database error, invalid expiry date crashes entire import

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Catalog Import

Steps to Reproduce:

1. Log in as supplier
2. Upload a PDF catalog containing product "MADECOSID- 2% POUDRE FL/2G"
3. Wait for processing
4. Observe import failure

Severity: High

Priority: High

Actual Result: Import fails with error: "Invalid prisma.supplierProduct.create() invocation" caused by expiryDate: new Date("Invalid Date") for product "MADECOSID- 2% POUDRE FL/2G". The entire import crashes because one product has an invalid or unparseable expiry date.

Expected Result: If one product has an invalid expiry date, the system should skip that product and continue importing the rest, or mark it for review, not crash the entire import or expose raw database errors.

Photo Attachments:

BUG-018

Title: AI incorrectly extracts section headers and OCR garbage as products

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Catalog Import → Product Extraction

Steps to Reproduce:

1. Upload catalog containing section headers (e.g., D-THREE AMP, MELIANE CP)
2. Wait for AI processing
3. Review extracted products

Severity: Medium

Priority: Medium

Actual Result: AI extracted 133 entries. Many are not real products — section headers counted as products (D-THREE AMP, MELIANE CP, MICARDIS 40 CP), OCR garbage (SATA Soe TL 2SOM, SN SRT ONO, JEDI Cr G20), and garbled text (ROY ACYL 0: 7DMUT/ instead of ROVAGYL).

Expected Result: AI should only extract actual products. Section headers, category labels, and OCR noise should be filtered out or flagged for review.

Photo Attachments:

BUG-019

Title: AI extracts 13 fake products from completely blank PDF

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Catalog Import

Steps to Reproduce:

1. Log in as supplier
2. Create a completely blank PDF (no text, no images)
3. Upload to catalog import
4. Wait for processing
5. Review extracted products

Severity: High

Priority: High

Actual Result: AI extracted 13 products from a blank PDF that contained zero content. Products are fabricated/hallucinated by the AI.

Expected Result: Blank PDF should return 0 products with a message like "No products found" or "Unable to extract products from empty file."

Photo Attachments:

BUG-020

Title: Product can be added with only a name, no validation for required fields

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Add Individual Product

Steps to Reproduce:

1. Log in as supplier
2. Navigate to Add Product
3. Enter only a name (can even be just ".")
4. Leave all other fields empty (image, description, price, discount, quantity, catalog, manufacturer, expiry date)
5. Submit the product
6. Observe result

Severity: Medium

Priority: Medium

Actual Result: Product gets added successfully with only a name field filled. Name can even be a single character like ".". All other fields are optional (only Catalog shows "optional" label, but others are not required either).

Expected Result: Required fields like price, quantity, and manufacturer should be mandatory. Name should have minimum length and not accept just "." as valid input. Product without essential data should not be added.

Photo Attachments:

BUG-021

Title: Inconsistent validation, quantity/discount/promo limited to 100 but price has no limit

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Add Individual Product

Steps to Reproduce:

1. Log in as supplier
2. Navigate to Add Product
3. Enter a large number in quantity (e.g., 101)
4. Observe error message
5. Enter a very large number in price (e.g., 999999999)
6. Observe result

Severity: Low

Priority: Low

Actual Result: Quantity, discount, promo quantity reject values above 100 with error: "Too big: expected number to be <=100". But price accepts any large value with no upper limit.

Expected Result: Validation should be consistent. Price should also have a reasonable upper limit, or quantity/discount should allow larger values depending on business needs.

Photo Attachments:

The screenshot shows the Pharma.XuPyter application interface. On the left is a dark sidebar with navigation links: Dashboard, My Products, My Catalogue, Urgent Requests, Open RFQs, My Quotations, Organization, Users, Dark Mode, and Sign out. The main area is titled 'Supplier products' and 'My Products', with a subtitle 'Manage products visible to pharmacies'. It displays a grid of product cards, each with a placeholder image and text like 'No manufacturer' and '0 units'. On the right, the 'Add Product' modal is open. It has a title bar with a close button. Below the title bar is a search bar. The modal contains three input fields: 'Price' (with a red box around it and a warning 'Too big: expected number to be <=100'), 'Discount %' (with a red box around it and a warning 'Too big: expected number to be <=100'), and 'Qty' (with a red box around it and a warning 'Too big: expected int to be <=9007199254740991'). There are also fields for 'Promo Qty' and 'Free Qty' with similar warnings. Below these is a 'Catalog (optional)' dropdown menu with the option 'Select catalog'. At the bottom, there is a 'Manufacturer' field with the text 'Probably a human'. The modal has two buttons at the bottom: 'Add Product' and 'Cancel'.

BUG-022

Title: No option to edit or delete product after creation

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Product List / Product Detail

Steps to Reproduce:

1. Log in as supplier
2. Add a new product
3. Navigate to the product in the product list
4. Look for edit or delete options

Severity: Medium

Priority: Medium

Actual Result: After creating a product, there is no visible option to edit or delete it. User cannot correct mistakes or remove incorrect entries.

Expected Result: Users should be able to edit product details (name, price, quantity, etc.) and delete products they no longer need.

Photo Attachments:

BUG-023

Title: Entering extremely large price causes database query failure popup

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Add Individual Product → Price field

Steps to Reproduce:

1. Log in as supplier
2. Navigate to Add Product
3. Enter a very large number in price field (e.g., 100 trillion)
4. Submit the product
5. Observe the popup

Severity: Medium

Priority: Medium

Actual Result: System shows popup: "A database query failed. Please try again." No user-friendly error or validation message about the price being too large.

Expected Result: Price should have a reasonable upper limit with a clear validation message like "Price is too high", not a database error popup.

Photo Attachments:

BUG-024

Title: Expiry date required error persists even after entering expiry date

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Quotation → Send Quote

Steps to Reproduce:

1. Log in as pharmacist
2. Create an urgent request
3. Log in as supplier and open the received request
4. Start sending a quote — leave expiry date empty
5. Observe error: expiry date is required
6. Enter a valid expiry date
7. Observe the error

Severity: High

Priority: High

Actual Result: After entering a valid expiry date, the "required" error message still appears. User cannot tell if the field is accepted or if the quote can be submitted.

Expected Result: Once a valid expiry date is entered, the error message should clear immediately.

BUG-025

Title: Misleading error, "Quantity must be a whole number" when entering extremely large number

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Create Request (Urgent) → Quantity field

Steps to Reproduce:

1. Log in as pharmacist
2. Create a new request (Urgent)
3. Add a product
4. Enter an extremely large number in quantity (e.g., 100 trillion)
5. Observe the error message

Severity: Low

Priority: Low

Actual Result: Error says "Quantity must be a whole number", but the actual issue is the number is too large, not that it isn't a whole number. 100 trillion IS a whole number.

Expected Result: Error should say something like "Quantity exceeds maximum allowed" or "Quantity is too large" with a clear limit shown.

BUG-026

Title: "Mark as Read" notification button takes ~8 seconds to respond

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Notifications panel → "Mark as Read" button

Steps to Reproduce:

1. Log in to the platform
2. Open notifications panel
3. Click "Mark as Read" at the end of a notification
4. Observe how long it takes to complete

Severity: Low

Priority: Low

Actual Result: After clicking "Mark as Read," the action takes approximately 8 seconds to complete. No loading indicator is shown during this time.

Expected Result: "Mark as Read" should complete instantly (under 1 second) with immediate visual feedback.

BUG-027

Title: Organization profile "Save Changes" silently fails, validation errors only visible under Location tab

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Organization Profile → Save Changes button

Steps to Reproduce:

1. Create a new account
2. Complete organization profile setup
3. Enter all required information
4. Click "Save Changes"
5. Observe the result
6. Click the "Location" button (next to Contact, near Organization heading)
7. Observe validation errors under country, city, etc.

Severity: High

Priority: High

Actual Result: Clicking "Save Changes" does nothing. No error message, no success message, no visual feedback. The form stays the same. User has no idea what's wrong. Validation errors for required location fields are only visible if the user navigates to the Location tab and selects country/city options.

Expected Result: Clicking "Save Changes" should either:

Save successfully with a confirmation message

Show clear validation errors on the relevant fields immediately (including location)

Auto navigate to the tab with the error

BUG-028

Title: Discount not saved/displayed after publishing product

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Add Product → After publishing → Product view

Steps to Reproduce:

1. Log in as supplier
2. Navigate to Add Product
3. Fill in product details including a discount
4. Publish the product
5. View the published product
6. Observe whether discount is shown

Severity: Medium

Priority: Medium

Actual Result: After adding a discount and publishing the product, the discount does not appear anywhere. Only the price is shown.

Expected Result: The discount should be saved and displayed on the product, either as a percentage, a discounted price, or a badge.

Photo Attachments:

BUG-029

Title: Submit Quotation button hidden behind three-dot menu, poor discoverability

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Urgent Request → Request details page

Steps to Reproduce:

1. Log in as supplier
2. Open an urgent request received from a pharmacist
3. Read through the request details
4. Look for a "Submit Quotation" button
5. Observe that no primary action button is visible
6. Click the three dot menu
7. Observe "Submit Quotation" and "Decline" options hidden inside

Severity: High

Priority: High

Actual Result: After reading an urgent request, there is no visible "Submit Quotation" button. The user has to find and click a three-dot menu (typically a secondary options menu) to access "Submit Quotation" and "Decline", the two most important actions on the page.

Expected Result: "Submit Quotation" should be a prominent primary button on the request page. "Decline" can be secondary. The three dot menu should be reserved for less critical options.

Photo Attachments:

BUG-030

Title: Urgent Request status always stays "Sent", never updates

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request/ Request status

Steps to Reproduce:

Scenario A — Mixed responses:

1. Log in as pharmacist
2. Create an Urgent Request(Normal and Urgent separately) and send to multiple suppliers
3. Supplier A declines
4. Supplier B submits a quotation
5. Check request status → still "Sent"

Scenario B — All decline:

1. Log in as pharmacist
2. Create an Urgent Request(Normal and Urgent separately) and send to multiple suppliers
3. All suppliers decline
4. Check request status → still "Sent"

Severity: High

Priority: High

Actual Result: Request status remains "Sent" in all scenarios, whether suppliers decline, accept, submit quotes, or all decline. This affects both Normal Requests and Urgent Requests.

Expected Result: Status should reflect the actual state: "Sent" = no responses yet, "In Review" / "Responses Received" = some responses in, "Declined" = all suppliers declined, "Completed" / "Closed" = awarded

Photo Attachments:

BUG-031

Title: Misleading error, "Quantity must be a whole number" when entering extremely large number in Urgent Request

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Create/Edit Urgent Request → Quantity field

Steps to Reproduce:

1. Log in as pharmacist
2. Create a new Urgent Request (or edit an existing one)
3. Add a product
4. Enter an extremely large number in quantity (e.g., 100 trillion)
5. Observe the error message

Severity: Low

Priority: Low

Actual Result: Error says "Quantity must be a whole number", but the actual issue is the number is too large, not that it isn't a whole number. 100 trillion IS a whole number.

Expected Result: Error should say "Quantity exceeds maximum allowed" or "Quantity is too large" with a clear limit shown.

[illegible]

BUG-032

Title: Close Urgent Request warning says cannot be undone, reopen works, and reopening changes status to In Review

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request → Close / Reopen action

Steps to Reproduce:

1. Log in as pharmacist
2. Open an Urgent Request
3. Click Close
4. Observe the warning that says action cannot be undone
5. Confirm close
6. Look for a reopen option
7. Click reopen
8. Observe the result and status change

Severity: Medium

Priority: Medium

Actual Result: Closing an Urgent Request shows a warning that the action cannot be undone. After closing, a reopen option appears and works. Reopening also changes the status to "In Review." The warning is misleading and the status behavior is inconsistent.

Expected Result: Either the warning should not say "cannot be undone" if reopen is available, or the reopen option should not exist. The status should update consistently and predictably.

BUG-033

Title: AI marks one supplier as having best expiry date when both suppliers have the same expiry date

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Quotation Comparison → AI comparison results

Steps to Reproduce:

1. Log in as pharmacist
2. Create an Urgent Request and receive quotations from two suppliers
3. Ensure both suppliers have the same expiry date for the product
4. View the AI comparison results
5. Observe the expiry date tags

Severity: Medium

Priority: Medium

Actual Result: AI gives a "best expiry date" tag to one supplier even though both suppliers have identical expiry dates for the same product. This falsely implies one option is better on expiry.

Expected Result:: If both suppliers have the same expiry date, no supplier should be tagged as best for expiry. The tag should only appear when one option is actually better.

Photo Attachments:

BUG-034

Title: Review Quotation page has broken scrolling, stuck and glitchy when scrolling down

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Review Quotation page

Steps to Reproduce:

1. Log in as pharmacist
2. Open the Review Quotation page
3. Scroll down
4. Observe the scrolling behavior

Severity: Medium

Priority: Medium

Actual Result: When scrolling down on the Review Quotation page, the scroll sometimes gets stuck and also glitches. The page appears to scroll while also staying in place, creating a jarring experience. Occurs intermittently.

Expected Result: Scrolling should be smooth and consistent throughout the page.

BUG-035

Title: Quotation Compare and Supplier Compare buttons both open the same Supplier Comparison page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request detail page → Quotation Compare and Supplier Compare buttons

Steps to Reproduce:

1. Log in as pharmacist
2. Open an Urgent Request that has received quotations
3. Locate the Quotation Compare button
4. Click it and note the page that opens
5. Go back to the request detail page
6. Locate the Supplier Compare button
7. Click it and note the page that opens
8. Compare both results

Severity: Medium

Priority: Medium

Actual Result: Both Quotation Compare and Supplier Compare buttons open the same Supplier Comparison page. There is no separate Quotation Comparison view.

Expected Result: Quotation Compare and Supplier Compare should be two distinct pages showing different data. Quotation Compare should show the quotation level comparison while Supplier Compare should show supplier level comparison.

BUG-036

Title: Supplier search bar does not filter results until at least 3 to 4 characters are typed

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Create Urgent Request → Supplier search bar

Steps to Reproduce:

1. Log in as pharmacist
2. Start creating an Urgent Request
3. Locate the supplier search bar
4. Type 1 character and observe the results
5. Type 2 characters and observe the results
6. Type 3 to 4 characters and observe the results

Severity: Medium

Priority: Medium

Actual Result: The supplier search does not filter or narrow results until at least 3 to 4 characters are typed. Typing 1 or 2 characters has no effect on the result list.

Expected Result: Search should filter results dynamically as each character is typed, or at minimum clearly show a message like "Type at least 3 characters to search" so the user understands the requirement.

BUG-037

Title: No visible scroll bar on Urgent Request form, users cannot tell more content exists below

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Create Urgent Request form

Steps to Reproduce:

1. Log in as pharmacist
2. Start creating an Urgent Request
3. Observe the form layout
4. Try to identify whether the page scrolls
5. Note that there is no visible scroll bar
6. Scroll down accidentally to discover additional fields

Severity: Medium

Priority: Medium

Actual Result: The Urgent Request form has no visible scroll bar. Users have no indication that more content exists below the visible area. Important fields are only discovered if the user accidentally scrolls down.

Expected Result: A visible scroll bar should be present when the content exceeds the viewport. Alternatively the layout should clearly indicate more content below using visual cues.

BUG-038

Title: Urgent Request send button does nothing if no supplier selected, error only visible after scrolling down

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Create Urgent Request → Send Urgent Request button

Steps to Reproduce:

1. Log in as pharmacist
2. Create an Urgent Request
3. Fill in all necessary information
4. Do not select any supplier
5. Click the Send Urgent Request button
6. Observe that nothing happens
7. Scroll down to find the error message

Severity: High

Priority: High

Actual Result: Clicking Send Urgent Request with no supplier selected does nothing. The button is clickable but there is no visible response. The validation error "Select at least one supplier" is only visible if the user scrolls down the page.

Expected Result: Clicking Send should either auto scroll to the error, highlight the supplier field, or show the error message near the button. The user should immediately understand what is missing.

BUG-039

Title: Publishing a saved draft Urgent Request shows success but status stays Draft and no supplier receives it

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request → Saved Draft → Publish action

Steps to Reproduce:

1. Log in as pharmacist
2. Create an Urgent Request
3. Save it as a draft
4. Open the draft later
5. Click Publish or Send
6. Observe the popup notification
7. Check the request status
8. Log in as the selected supplier and check if the request was received

Severity: High

Priority: High

Actual Result: A popup appears saying the Urgent Request has been sent. But the status remains on Draft and none of the selected suppliers receive the request.

Expected Result: After publishing, the status should change from Draft to Sent, and all selected suppliers should receive the Urgent Request.

BUG-040

Title: Supplier declining Urgent Request after editing quote does nothing despite confirmation warning

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Submitted Quote → Edit → Decline Urgent Request

Steps to Reproduce:

1. Log in as supplier
2. Submit a quote to a pharmacist's Urgent Request
3. Go to edit the quote
4. Click Decline Urgent Request
5. Observe the warning that says the action cannot be undone
6. Confirm decline
7. Observe the result

Severity: High

Priority: High

Actual Result: Clicking Decline Urgent Request shows a warning that the action cannot be undone. After confirming, nothing happens. The Urgent Request is not declined and no feedback is shown.

Expected Result: Clicking Decline Urgent Request should actually decline the Urgent Request and update the status. A confirmation message should appear and the pharmacist should be notified.

BUG-041

Title: Editing a quotation creates duplicate entries even without changes, pharmacist sees multiple quotations per submission

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Edit Quotation AND Pharmacist Dashboard → View Quotations

Steps to Reproduce:

1. Log in as supplier
2. Submit a quotation for an Urgent Request
3. Click Edit on the quotation and save without changing anything
4. Repeat the edit and save two more times
5. Log in as pharmacist
6. Check the quotation count in the status bar

Severity: High

Priority: High

Actual Result: Every time the supplier clicks Edit and saves, a new quotation entry is created even if nothing was changed. Three edits with no changes result in four total quotations shown to the pharmacist.

Expected Result: Editing a quotation should update the existing entry, not create duplicates. The pharmacist should see one current quotation per supplier regardless of how many times it was edited. Version history may be tracked separately.

BUG-042

Title: Pharmacist cannot view supplier quotation unless supplier edits it

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request→ View Quotations

Steps to Reproduce:

1. Log in as supplier
2. Submit a quotation for an Urgent Request
3. Do not edit the quotation after submitting
4. Log in as pharmacist
5. Try to view the received quotations

Severity: High

Priority: High

Actual Result: If the supplier does not edit the quotation after submitting, the pharmacist sees no quotation received yet when trying to view it.

Expected Result: The pharmacist should be able to view the quotation as soon as the supplier submits it, without requiring any edit.

The screenshot displays the Pharma XUPYTER web application interface. The top navigation bar includes a logo, user profile, and search icons. The main header shows the URL "pharma.xupyter.in/en/app/procurement/urgent/cmtx2qqqg0023027f8upa3eb6". The left sidebar contains menu items like Dashboard, Urgent Requests, Suppliers, and Catalogue. The central panel displays the "RFQ-2026-00015 - Supplier Comparison" page for "Naproxen". It lists two suppliers: "Testing account" and "testingl". The "testingl" supplier is highlighted with a red circle. Below the table, there are summary cards for price and expiry.

SUPPLIER	UNIT PRICE	EFF. PRICE	DISCOUNT	PROMO	EXPIRY DATE
T Testing account	\$10.00	\$10.00	-	-	Jan 2011
T testingl	\$10.00	\$10.00	-	-	Jan 2010

Summary Cards:

- PRICE \$10.00 avg/... Testing account
- EXPIRY Freshest st... Testing account

A red button at the bottom right says "Place Order with Testing account".

BUG-044

Title: Best supplier card title is cut off, showing truncated texts

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — Desktop

Page/Location: Pharmacist Dashboard → Urgent Request → Quotation Comparison

Steps to Reproduce:

1. Log in as pharmacist
2. Open an Urgent Request with multiple quotations
3. View the AI comparison results
4. Look at the highlight box showing the best supplier with the best tag
5. Observe the title or description text in the box

Severity: Low

Priority: Low

Actual Result: The supplier shown in the best tag box has its title or description cut off. For example "freshest st..." instead of the full text.

Expected Result: The full title or description should be visible, either by wrapping to a second line or expanding the box. No text should be truncated.

Photo Attachments:

The screenshot shows the 'Pharmacist Dashboard' with a sidebar on the left containing navigation links like 'Dashboard', 'Urgent Requests', 'Requests (RFQs)', 'Quotations', 'Purchase Orders', 'Suppliers', and 'Catalogs'. The main content area is titled 'RFQ-2026-00015 — Supplier Comparison'. It displays a table of suppliers for 'Naproxen' with columns: SUPPLIER, UNIT PRICE, EFF. PRICE, DISCOUNT, PROMO, and EXPIRY DATE. The 'Best pick' is 'Testing account' with a unit price of \$10.00 and an expiry date of Jan 2011. Below the table, there are two red boxes highlighting the 'PRICE' and 'EXPIRY' details. The 'PRICE' box shows '\$10.00 avg/...' and the 'EXPIRY' box shows 'Freshest st...'. A 'Place Order with Testing account' button is visible at the bottom right.

SUPPLIER	UNIT PRICE	EFF. PRICE	DISCOUNT	PROMO	EXPIRY DATE

BUG-046

Title: AI recommends supplier with expired product over supplier with valid expiry date

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request → Quotation Comparison → AI recommendation

Steps to Reproduce:

1. Log in as pharmacist
2. Create an Urgent Request
3. Receive quotations from two suppliers
4. Supplier 1 quote: unit price 10, discount 10%, expiry date 2010 (expired)
5. Supplier 2 quote: unit price 10, discount 5%, expiry date 2028 (valid)
6. View the AI recommendation and comparison

Severity: High

Priority: High

Actual Result: AI recommends Supplier 1 even though the product expiry date is 2010 (expired). In the Supplier Comparison view, the expiry date is clearly flagged in red, yet the AI still picks this supplier as the best option.

Expected Result: AI should never recommend a supplier with an expired product. Expiry date must be a critical factor in the recommendation logic. If a product is expired or near expiry, it should be disqualified or heavily penalized in the ranking.

Photo Attachments:

BUG-047

Title: AI picks one supplier as best when both quotations are identical, instead of flagging a tie

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request → Quotation Comparison → AI recommendation

Steps to Reproduce:

1. Log in as pharmacist
2. Create an Urgent Request
3. Receive quotations from two suppliers with identical values: same price, same discount, same expiry, same free units, same promo qty
4. View the AI recommendation and comparison

Severity: Medium

Priority: Medium

Actual Result: AI randomly picks one supplier and gives it all the "best" tags and marks it as recommended, even though both quotations are exactly the same.

Expected Result: When two or more quotations are identical, the AI should flag it as a tie or show both as equally recommended. It should not arbitrarily favor one supplier over the other.

Photo Attachments:

The screenshot shows the Pharmacist Dashboard interface. The left sidebar contains navigation links: Dashboard, Urgent Requests, Requests (RFQs), Quotations, Purchase Orders, Suppliers, and Catalogs. The main content area displays the 'Request Details' for 'Paracetamol' (RFQ-2026-00018). The 'Request Details' section shows 'MAXIMUM QUOTATIONS: 20' and 'QUOTES RECEIVED: 2'. The 'Line Items' section shows 'Paracetamol' with a quantity of 100. The 'Supplier Comparison' table lists two suppliers: 'testing1' and 'Testing account'. Both suppliers have identical values: Unit Price of \$10.00, Effective Price of \$9.00, and a 10% discount. The AI recommendation is shown as 'Best pick: testing1'.

SUPPLIER	UNIT PRICE	EFF. PRICE	DISCOUNT	PROMO	EXPIRY DATE
testing1	\$10.00	\$9.00	-10%	—	Jan 2030
Testing account	\$10.00	\$9.00	-10%	—	Jan 2030

Summary statistics at the bottom:

- PRICE: \$9.00 avg/u... Testing account
- EXPIRY: Freshest st... Testing account
- DISCOUNT: 10.0% a... Testing account

Buttons: 'Place Order with testing1'

BUG-048

Title: Supplier entered Promo Qty and Free Units but pharmacist sees none of them

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Supplier Dashboard → Submit Quotation AND Pharmacist Dashboard → Urgent Request → Quotation Comparison

Steps to Reproduce:

1. Log in as supplier
2. Submit a quotation with Promo Qty and Free Units filled in
3. Submit the quotation
4. Log in as pharmacist
5. Open the quotation comparison page
6. Check the Promo Qty and Free Units values shown for that supplier

Severity: High

Priority: High

Actual Result: Supplier entered Promo Qty and Free Units in the quotation form, but the pharmacist sees zero or blank values for those fields on the comparison page.

Expected Result: Promo Qty and Free Units submitted by the supplier should be visible to the pharmacist exactly as entered. These are key comparison factors.

BUG-049

Title: "Award Quotation" button on View Quotation page is grayed out and unusable, only works from a different page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent Request → View Quotation page

Steps to Reproduce:

1. Log in as pharmacist
2. Open an Urgent Request that has received quotations
3. Go to the View Quotation
4. Try clicking Award Quotation

Severity: Medium

Priority: Medium

Actual Result: The Award Quotation button on the View Quotation page is grayed out and cannot be clicked. The only way to award a quotation is to click on the quotation itself and navigate to a different page where the award action is available. The button on this page appears useless.

Expected Result: Either the Award Quotation button should work on this page or it should be removed to avoid confusion. Users expect visible buttons to be functional.

Photo Attachments:

BUG-050

Title: Only "Place Order" option is for AI recommended supplier, no way to choose a different supplier

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → Urgent requests → View Quotations → Supplier Comparison → Bottom action button

Steps to Reproduce:

1. Log in as pharmacist
2. Open an Urgent requests with multiple quotations
3. Go to Supplier Comparison
4. Look for options to choose a different supplier
5. Observe the only action button

Severity: High

Priority: High

Actual Result: Only button is "Place Order with [AI recommended supplier]." No way to select a different supplier even if AI is wrong or the pharmacist disagrees.

Expected Result: Pharmacists should be able to choose any supplier from the comparison. AI should assist the decision, not force it.

Photo Attachments:

BUG-051

Title: RFQ detail only has Compare Supplier button, comparison is incomplete and no way to select a supplier

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — tested across Desktop & Mobile.

Page/Location: Pharmacist Dashboard → RFQ detail page (after quotations received)

Steps to Reproduce:

1. Log in as pharmacist
2. Open an RFQ that has received quotations
3. Observe the available buttons on the RFQ detail page
4. Click Compare Supplier
5. Review the comparison page and look for a way to select a supplier

Severity: High

Priority: High

Actual Result: The only button available on the RFQ detail page is Compare Supplier. Clicking it opens a rough and incomplete comparison. There is no select or award supplier button anywhere. The flow is unusable.

Expected Result: The RFQ detail should allow the pharmacist to view quotations, compare suppliers, and select or award a supplier. The comparison should be complete with all data and a clear action to proceed.

Photo Attachments:

BUG-053

Title: Import button cut off at bottom of screen on finalized catalog import page

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — Mobile

Page/Location: Supplier Dashboard → Catalog Import → Finalized page

Steps to Reproduce:

1. Log in as supplier on mobile
2. Start a catalog import
3. Proceed to the finalized page
4. Look at the Import button at the bottom

Severity: Medium

Priority: Medium

Actual Result: The Import button is half out of the screen at the bottom of the finalized page. It is partially cut off and hard to tap.

Expected Result: The button should be fully visible and easily tappable on mobile. Layout should adjust so all action buttons fit within the screen.

Photo Attachments:

BUG-054

Title: Retry button shows raw translation key "common.retry" instead of label on mobile

Environment: Chrome, Firefox, Edge, Opera, Brave & Safari — Mobile

Page/Location: Supplier Dashboard → Urgent Requests

Steps to Reproduce:

1. Log in as supplier on mobile
2. Go to Urgent Requests
3. When no urgent requests are visible, observe the retry button below the empty state text

Severity: Low

Priority: Low

Actual Result: The retry button displays the raw translation key "common.retry" instead of the actual label "Retry."

Expected Result: The button should show "Retry" or the correct translated text for the user's language.

Photo Attachments:

Suggestion-001

Title: Privacy Policy uses technical/internal language that may confuse end users

Page/Location: Privacy Policy page → throughout the document

Observation: The Privacy Policy contains internal implementation details and developer language such as "EMAIL_PROVIDER", "sandbox/production", "enableAuditLogging", "class-validator", "bcrypt cost 12", and "JWT access tokens (15 min)". This reads like internal documentation rather than a user-facing legal page.

Recommendation: Rewrite the Privacy Policy using simpler, user-friendly language appropriate for the target audience (pharmacists, suppliers, and business users). Internal technical details can be kept in separate internal documentation if needed.

Photo Attachments:

Suggestion-002

Title: Discount field label is ambiguous, unclear whether value is percentage or fixed amount

Page/Location: Supplier Dashboard → Submit Quotation → Discount field

Observation: The Discount field does not indicate whether the entered value represents a percentage or a fixed amount. Testing shows the value is treated as a percentage of the unit price, but this is not communicated anywhere in the UI.

Recommendation: Update the label to "Discount (%)" or add a helper text like "Enter percentage off unit price" so users understand what they are entering. Alternatively, provide a toggle for percentage vs fixed amount if both are supported.

Photo Attachments:

The screenshot displays a web application interface for procurement. On the left is a sidebar with navigation links like 'Dashboard', 'My Products', 'My Catalogs', 'Urgent Requests', 'Open RFQs', 'My Quotations', 'Organization', 'Tools', 'Dark Mode', 'Logout', and 'Falcon Pharma Organization Admin'. The main content area shows 'Procurement > Details' for 'Naproxen'. It includes 'Request Details' with RFQ number 'RFQ-2025-48815', 'MAXIMUM QUOTATIONS: 20', and a 'Line Items' table with one item: 'Naproxen' with a quantity of '1'. A 'Quick Quote' modal is open on the right. It shows 'Naproxen' with 'Requested: 1' and a 'Complete' button. Below this are input fields for 'Unit Price' (10), 'Discount' (1, circled in red), 'Promo Qty' (0), and 'Free Units' (0). An 'Expiry Date' field is set to '1 / 1 / 2010'. The modal also shows 'Deliver 1 units' and a 'Net Total: \$10.00'. At the bottom, the 'Overall Total' section shows 'After discount & promo: \$9.90' (circled in red). 'Cancel' and 'Send Quote' buttons are at the bottom right.
